

Yetunde Abdul

Head of Climate Action at UKGBC

Yetunde leads their Advancing Net Zero and whole life carbon reduction work.

A life scientist by training, she has become a sustainability and green building specialist previously working for property investment and management, engineering and environmental consultancies, standard setting and certification organisations. Her experience spans ESG, energy and carbon management and reduction, environmental management and resource efficiency, ecological value and biodiversity net gain and wellbeing & social responsibility.

As a chartered environmentalist, Yetunde has been involved in projects in the UK, Europe, Africa, and Asia, bringing a greater understanding of the implications for sustainability planning, construction, building operation and management and governance in a range of social and climatic contexts.
